

## Isabella's Garden – These are the shoots

**This week we are making a ladybird and you will need:**

Black and red paper – or white paper

Red and black crayons or felt tips

Glue

A split pin

Scissors

Paints, pencils, crayons

Green wool, green paper, green crayons or felt tips

### A Ladybird

Cut out two large circles - one black and one red (or colour one red and one black ). This is our ladybird's body

Cut out one small circle – this is the ladybird's head (black paper or colour it black)

Cut out two small strips (black) for the ladybird's antennae

Draw a face on the head and stick it onto the body

Add the two antennae

Draw some dots on the red circle and cut it in half – these are the wings

If you have a split pin – make a hole in the top of each of the wings and through the top of the body and push the pin through (your wings should open and close) or you can just stick them on

### Give your ladybird a name ...

**Fingerprint Ants and insects -** *You can make a butterfly, a spider, a beetle or your own bug.*

Choose two or three of your favourite paints

To make an ant, dip your finger in some paint and make four prints in a line, one for the ant's head and three for the body

Give your ant two antennae on its head and two legs on each section of the body

Chose a different colour and make a couple more fingerprints

Make each fingerprint into a different insect by adding legs, wings etc

## Isabella's Story picture

With your wool, string, material or crayons give your seeds some roots and some shoots (just like in the story you heard '*The Seedling that didn't want to Grow Up*'

- **Take photos of your art and send it to us by Facebook**
